Making Memories - Autumn Jelly

You will need

- Vegetable Gelatine* or jelly mix (I used 3 sachets of vege-gel for a mixing bowl sized jelly)
- Cold Water (1 pint per sachet)
- Whisk or spoon
- Pan
- Container/s (I used a pyrex bowl but you could use small bowls, cups or jelly moulds)
- Tray (for investigation)
- Leaves, conkers, flowers and any other signs of Autumn you can collect. Please ensure that all of the items you use are safe.

* As its name suggests, vegetable gelatine contains no meat products so it is suitable to be handled by all children. It is really simple to use. As it is used for cooking and deserts it doesn't set as firmly as classic jelly. If you want your jelly to be firmer then just add less water.

What to do

- * Put 1 pint of cold water per sachet into a pan
- * Add the gelatine and whisk
- * Bring the liquid to the boil (it will begin to thicken a little bit as it get to boiling point)
- * Being VERY careful, pour the boiling liquid into your bowl/mould/moulds

TIP – The gelatine thickens as it cools. If you add all of your Autumn treasures to this very hot liquid, most of them will just float on the top and a lot of the flowers and leaves will wilt because of the heat. If that happens then your jelly will look rubbish!

- * Let the liquid cool for 30 – 45 mins then start to add your leaves etc. You should find that you are able to spread them about a bit more as the liquid is thicker and cooler. I found that the conkers sank to the bottom regardless!
- * Leave to set – this only takes a couple of hours
- * It was interesting to look at even before we turned it out of the bowl, especially in the sunshine.
- * It came out of the bowl really easily.
- * Turn out onto a tray

Let the children explore!
